

ANTI-LOCK BRAKING SYSTEM

TOWING TECHNOLOGY DESIGNED TO LET YOU HAUL SAFER AND SMARTER THAN EVER!

The Lippert trailer anti-lock braking system combines the best of ABS and connected RV technology to deliver a comprehensive safety platform for all trailer types, particularly travel trailers and other RVs.

Our ABS system works with the trailer brakes, fully integrating with the existing platform to deliver exceptional towing safety.

**Whenever, wherever, we
make your experience better.**

HAUL SAFER AND SMARTER THAN EVER

Additional Features

- Promotes exceptional towing safety and driver confidence
- Improves control on slippery roads and in emergency braking situations
- Integrates with trailer brakes to prevent trailer wheel lock-up
- Ready to connect to the OneControl app and Compass Connect
- App provides digital odometer, system monitoring and more
- Applicable across virtually all trailer types (2-6 wheels, 1-3 axles)
- Works with electromagnetic drum brakes (7-way wiring connector required)
- Fully compatible with or without OEM or aftermarket brake controllers
- Non-intrusive system will not interfere with trailer gain settings
- All-encompassing kit includes everything needed for complete installation
